-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1,2,24,36,37 are rejected under 35 U.S.C. 102(b) as being anticipated by Piaget et al .

Note that the Piaget et al motor's transmission is considered an interconnection element and the motor is the resistance element.

As to claims 36-37, the motor acts as a resistive element ,such as when the motor is off and the motor rotates the endless belts when in an "on" mode.

Allowable Subject Matter

3. Claims 3-6,19 and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

The Piaget motor can both act as a resistance device and act to rotate the endless belts; therefore, both claims 1, 24, and 36-37 are met.

Applicant's reasoning suggesting that the limitations of claims 36-37 should be inferred in claims 1 and 24 is not understood. Applicant is wrongly arguing a limitation not present in claims 1 and 24. Each claim is a separate legal entity. It is improper to limit the scope of a claim by reading a limitation from another claim into it.

Kuo has a resistance mechanism similar to applicant's figure 1 embodiment wherein cylinders 17 act as resistive elements which are different from applicant's claimed resistance elements operably coupled with the interconnection assembly. The claim 1 and 24 limitations are therefore construed as having resistance elements directly coupled to the interconnection assembly as opposed to Kuo and applicant's figure 1 cylinders 76.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 3764

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
